

## **Ms. Carey's Final Advice and Thoughts**

Congratulations! You have worked all semester long, kept at it when the going got tough, and are almost finished. This is terrific. No matter what your grade is right now, the following is true:

**Many students don't show the kind of discipline and commitment that you have, and they don't learn very much as a result. Just by staying with it, you almost certainly know a lot more than you did when you started. Some of you have learned a LOT! Congratulations.**

**If you plan to take more math – either repeating this class or going on to the next class –DO IT NOW!  
Don't wait until you've forgotten what you know. Take it next semester!**

### **LAST THOUGHTS**

I appreciate students who stay with it to the end. This means you. Thank you.

Please stay in touch. Come by and tell me about your transfer plans, your classes, what's going on with you, -- and when you graduate and move on, come back and tell me about your life.

Good luck with your exams this semester, and with all of your classes and life choices. I wish each of you great success and happiness both now and in the future.
