

Using One Table for Several Functions Classic View

Objectives:

- Use and interpret an AUTO table with multiple columns
- Use and interpret an ASK table with multiple columns

Use and interpret an AUTO table with multiple columns

KEY CONCEPT: The functions in Y= menu are the same functions used for TABLE!

Example 1: Graph $f(x) = 2x^2 + 3x + 1$, $g(x) = 2x^2 + 3x - 1$, $h(x) = 2x^2 + 3x + 4$ and $k(x) = 2x^2 + 3x - 4$ together in the standard window.

Press:

See:

Example 2: Use an AUTOMATIC table to complete the following table of values for the functions in Example 1.

| x | y_1 | y_2 | y_3 | y_4 |
|----|-------|-------|-------|-------|
| -1 | | | | |
| 0 | | | | |
| 1 | | | | |
| 2 | | | | |

To start an automatic table at -1 that advances by 1, press:

See:

| X | Y1 | Y2 |
|----|----|----|
| -1 | 0 | -2 |
| 0 | 1 | -1 |
| 1 | 6 | 4 |
| 2 | 15 | 13 |
| 3 | 28 | 26 |
| 4 | 45 | 43 |
| 5 | 66 | 64 |

Press + for ΔTbl

Copy the values for y_1 and y_2 , then press  four times to move past y_1 and y_2 to y_3 and y_4

| X | Y_3 | Y_4 |
|----|-------|-------|
| -1 | 3 | -5 |
| 0 | 4 | -4 |
| 1 | 9 | 1 |
| 2 | 18 | 10 |
| 3 | 31 | 23 |
| 4 | 48 | 40 |
| 5 | 69 | 61 |

See: $Y_4 = -5$ and complete the rest of the table.

Answer:

| x | y_1 | y_2 | y_3 | y_4 |
|----|-------|-------|-------|-------|
| -1 | 0 | -2 | 3 | -5 |
| 0 | 1 | -1 | 4 | -4 |
| 1 | 6 | 4 | 9 | 1 |
| 2 | 15 | 13 | 18 | 10 |

Use and interpret an ASK table with multiple columns

Example 3: Complete an ASK table for $y_1 = 3x - 7$, $y_2 = -x^2 + 4$, $y_3 = x^3$, and $y_4 = -\frac{1}{6}x + 2$

| x | y_1 | y_2 | y_3 | y_4 |
|----|-------|-------|-------|-------|
| -1 | | | | |
| 0 | | | | |
| 7 | | | | |

Solution: Input the four functions in $Y=$, then start an ASK table, in TBLSET, by changing only the Independent Variable to ASK, by pressing:

then press the x-values

. Copy two columns, then press  four times.

See:

| P1ot1 | P1ot2 | P1ot3 |
|---------------------------|-------|-------|
| $\backslash Y_1$ $3X-7$ | | |
| $\backslash Y_2$ $-X^2+4$ | | |
| $\backslash Y_3$ X^3 | | |
| $\backslash Y_4$ $-X/6+2$ | | |
| $\backslash Y_5$ = | | |
| $\backslash Y_6$ = | | |
| $\backslash Y_7$ = | | |
